## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4, 9, 11, 13, 15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 20010022644 (644) in view of US005148301A (301).

Per claims 1, 4 and 9, 644 teaches a card comprising: a display device comprising a first semiconductor element comprising a first polycrystalline semiconductor film [TFT in pixel section and see paragraph 162]; a first thin film integrated circuit comprising a second semiconductor element comprising a second polycrystalline semiconductor film [the analog switch TFT]; a first substrate [130]; and a second substrate [135], wherein the display device is electrically connected to the first thin film integrated circuit [pixel 144 is connected to pixel TFT], wherein the thin film integrated circuit and the display device are sealed with a resin between the first substrate and the second substrate of the card [L in figure and figure 19 show the circuit sealed by seal 19], and wherein the first substrate and the second substrate comprise a plastic material [see paragraph 125]. 644 lacks the seal made from resin. However, it was well known to use resin seals for simplifying manufacturing. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of invention.

Regarding the circuit and display device covered sealed with the resin, 644 lacks this limitation. However, 301 teaches covering the circuit and display a resin 108 for protecting the integrated circuits. Accordingly, it would have been obvious to one of ordinary skill at the time of invention to combine the configuration of 301 with the display of 644.

Per claim 5, 644 teaches a card of claim 1 further comprising a second integrated circuit wherein the first and second thin film integrated circuits are laminated [each TFT is laminated onto the substrate].

Per claims 13, 15 and 17, 644 teaches a card according to claims 1, wherein the card is an IC card [see paragraph 179].

Per claims 2, 3 and 11, 644 teaches a card according to claim 1, but lacks the card having a thickness from 0.05 mm through 1.5 mm, a passive matrix and being a light emitting device. However, each of these limitations were well known because of the desire to create lighter cards, decrease manufacturing costs and reduce thickness by removing the light source, respectively. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of invention.

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

### Response to Arguments

Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.

Application/Control Number: 10/739,084 Page 4
